Your Instructor

Tresta Neil was raised under the New Mexican sunsets and loves Mexican and Navajo food. She learned about the miracle of the body in nursing school at Weber State and about centering her life on Christ on her mission to the Netherlands. She received many diplomas from the Institute of Religion with a focus on Old Testament and Hebrew culture. She remains hungry for knowledge about symbols, rituals and patterns within the scriptures and the ancient Hebrew and Persian cultures. She is the author of “God Saw That It Was Good”, “The Theology Tree” and co-directs the LDS Homeschool Conference with her husband, Thom.

She met Thom in a nursing home where they worked together and after living in four different states they call Utah home. She is learning patience while homeschooling her eight children.

Her passion is teaching and writing. If she had to choose only one subject to study she would study religion in the stars.
